

**Sunday 17<sup>th</sup> May 2020—Donald D. Berment—Specialist, HSDS/NGA/DVC—1-868-383-6184.**

In my response to the **Opposition Leader Kamla Persad Bissessar** sharing of her past abuse and her commitment to the development of Trinidad and Tobago today, Sunday the 17th day of May 2020, I shared the LESSONS LEARNT FROM MY ABUSE OF 46 YEARS by this present administration. Hopefully, one day, armed with a LLB. in Law, I will be able to put my case before our Courts and receive compensation for my 46 years of abuse, with a minimum of cost, claiming big punitive damage costs.

Much thanks for sharing, Mrs. Bissessar, **"One Who Felt It Knows It," my quote**. There are so many things you and the UNC can do now to protect us from this **element of abuse** coming from the **PNM HIERARCHY** and my sincere hope is that God will grant you and the UNC time and fortitude to get the job done. ([donaldberment@gmail.com](mailto:donaldberment@gmail.com) always willing to help).

**Designing and preparing the necessary tools in the first instance and delivering them when the people return your government to the corridors of power, is a suggestion for you to consider, in addition to the wonderful economic plans already on the table and evidence of positive planning in the past.**

Those WHO did not know what power we give to our leading politicians, definitely knows it now. Those WHO FEEL that they will not vote for change of government, must THINK TWICE about not voting again. God has sent a powerful message to humanity **SHAPE UP OR SHIP OUT**. Those with eyes to see and ears to hear are advised accordingly.

**I survived my 40 plus years abuse, like you fearlessly, to be a better citizen, by using my time abused by PNM Policies in place, blatantly fraudulent at times, to study and today I function as a SPECIALIST IN HOUSING AND SETTLEMENT DEVELOPMENT, capable of surviving on a SHOESTRING BUDGET.**

This Sector of the Built Environment, incorporates the principles of 5 Disciplines, ARCHITECTURE, LAW, SOCIAL PSYCHOLOGY, POLITICAL SCIENCE AND PARENTING. Unfortunately, academic accreditation is not yet possible to be received, as no University in the world, many with Faculties in the Built Environment, offers these subjects together, for the effective managing of the said Housing and Settlement Development Sector, a FACT not allowing for Future Sustainable Growth of Architecture.

**Australia opened a door recently to offer a Practice Based PhD, to persons like me doing such research work, but time and money is a factor and leaving my beloved country for any long period of study, is not an option, I will be happy with. Too much work to be done here in TT and too little time to do it.**

A country with a GOLDEN RATIO (**a concept of the Union of International Architects UIA**) of Architect to Population of 1 Architect to 9,000 persons here in Trinidad and Tobago, that accreditation cannot be compared to what God has already provided in blessings. **With such a Ratio, I will have to live 9,000 years to satisfy my market and a child is born every 9 months and an Architect trained every 7 years.** I have good health at 72 years of age, a daughter of 36 years of age and a grandson almost 7 years of age and 46 years philosophical research work in Architecture, disseminating a large volume in a Cloud Archive <https://www.archive.org/details/@mavawsec>. **153 Uploads to date, all available for free download and sharing, with standard copyright guidelines. God blessings, Mrs. Bissessar, on your future efforts for you, your family and the UNC.** Signed.....**Natural Growth Architect/DVC.**
